

Cruzer Professional

Secure and Fast Portable Storage for Business Professionals

Product Highlights

- Powerful, hardware-based encryption
- Configurable private area for sensitive files
- Ultra-fast transfer speeds

USB drives are great for taking data on the go. This portable nature also makes these drives susceptible to loss or theft — an unacceptable risk for your important business information.

Cruzer® Professional USB drives give you the freedom of a USB drive without all the worry. It employs powerful security to protect even the most sensitive data. Users can create a private, password-protected section of the drive in which to store confidential information. While less sensitive information can be stored in a public section for easy access and sharing.

Rigid Security, Superior Speed

Unlike most flash drives that tout security, the ultra strong encryption offered by the Cruzer Professional is **hardware based**. That means files stored on it are more secure, since all security features are performed onboard by the device — and not by the operating system. It contains sophisticated security features, including a lock down mode when it detects hacker-like behavior — such as consecutive wrong password attempts.

These tough security measures don't hamper the speed of the Cruzer Professional, boasting exceptionally-fast transfer rates: 24MB/sec read and 20MB/sec write.*

Inherent Simplicity

Cruzer Professional is a true plug-and-play device, requiring no driver installation or special usage rights. This allows users to take their public and private data to other PCs, quickly and effortlessly. Users can simply plug it in to access public files; or run the onboard Cruzer Professional application and enter a password to access private information.

SanDisk®

Specifications

Product Features

- Strong hardware based encryption (256-bit AES), independent of operating system
- Password-protected area for sensitive files
- Device “Lockdown” mode when a set number of incorrect password attempts are made
- Ultra fast transfer speed – 24MB/s Read, 20MB/s write.
- Enhanced for Windows® ReadyBoost™
- Available in 1, 2, and 4GB** configurations

Supported Platforms***

- Windows 2000 SP4 or higher
- Windows XP SP1 or higher
- Windows 2003 server
- Windows Vista

Note: No security technology can be guaranteed to be 100% secure and as such SanDisk cannot guarantee that your data will be secure from unauthorized access, disclosure, alteration or destruction.

** Based on internal testings; performance may be lower depending upon host device. 1 megabyte (MB) = 1 million bytes.*

*** Note: 1 gigabyte (GB) = 1 billion bytes. Some of the listed capacity is used for formatting and other functions, and thus is not available for data storage.*

**** No driver installation required*
